

# WEBSITES ABOUT THE FUTURE

URL	Description
<a href="https://www.biochar.ac.uk/">https://www.biochar.ac.uk/</a>	The UK Biochar Research Centre (UKBRC) is based at the University of Edinburgh, School of GeoSciences, on the science campus at King's Buildings.
<a href="https://www.postcarbon.org/">https://www.postcarbon.org/</a>	Founded in 2003, Post Carbon Institute's mission is to lead the transition to a more resilient, equitable, and sustainable world
<a href="https://www.lowtechmagazine.com/">https://www.lowtechmagazine.com/</a>	<u>Low-tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practice</u>
<a href="https://www.greenwizards.com/">https://www.greenwizards.com/</a>	"So what is up with this whole site? I mean "Wizards"? Is this place serious about the Future or just a collection of "wantabees" in their parent's basements?"
<a href="https://ourfiniteworld.com/">https://ourfiniteworld.com/</a>	The author of Our Finite World is Gail Tverberg. She is a researcher focused on figuring out how energy limits and the economy are really interconnected, and what this means for our future
<a href="https://www.thegreatsimplification.com/">https://www.thegreatsimplification.com/</a>	The Great Simplification with Nate Hagens is a podcast that explores the systems science underpinning the human predicament
<a href="https://un-denial.com/">https://un-denial.com/</a>	I'm a 65 year old retired systems software developer and high-tech executive with an honors M.A.Sc. Electrical Engineering degree from UBC. I'm concerned about human overshoot, the damage we are doing to a very special planet, and the high probability of collapse in the not too distant future. I'm fascinated and horrified by our collective denial
<a href="https://surplusenergyeconomics.wordpress.com/">https://surplusenergyeconomics.wordpress.com/</a>	This website is intended for those interested in economics and related subjects. It does not provide investment advice, and must not be used for this purpose. Information given here is believed to be reliable but cannot thus be guaranteed. No liability can be accepted for any material contained on this website. Material published here is copyright, but can be quoted in brief, provided that attribution is given.
<a href="https://consciousnessofsheep.co.uk/">https://consciousnessofsheep.co.uk/</a>	The Consciousness of Sheep is a news and opinion site documenting the ongoing crises in the economy, energy, environment and society.
<a href="https://richardheinberg.com/">https://richardheinberg.com/</a>	Richard is Senior Fellow of <u>Post Carbon Institute</u> , and is regarded as one of the world's foremost advocates for a shift away from our current reliance on fossil fuels. He is the author of fourteen books, including some of the seminal works on society's current energy and environmental sustainability crisis:
<a href="https://www.imf.org/en/Blogs">https://www.imf.org/en/Blogs</a>	The IMF is a global organization that works to achieve sustainable growth and prosperity for all of its 190 member countries. It does so by supporting economic policies that promote financial stability and monetary cooperation, which are essential to increase productivity, job creation, and economic well-being. The IMF is governed by and accountable to its member countries

<a href="https://degrowth.info">https://degrowth.info</a>	To nurture worlds based on collectivity, care, and liberation within ecological boundaries, and dismantle capitalist, colonial and patriarchal structures of domination that destroy life.
<a href="https://blogs.uwe.ac.uk/sustainable-planning-and-environments/tag/localism/">https://blogs.uwe.ac.uk/sustainable-planning-and-environments/tag/localism/</a>	Centre for Sustainable Planning and Environmental blog.
<a href="https://www.degrowthvienna.org">https://www.degrowthvienna.org</a>	Degrowth Vienna's first objective as a collective is introducing the degrowth perspective into political and societal discourse around responses to the multiple crises in international academic discourses, political spaces and organizations/institutions in Vienna.
<a href="https://www.blog.gov.uk/">https://www.blog.gov.uk/</a>	Government UK Blogs
<a href="https://preview.mailerlite.io/emails/webview/125516/112700993936819394">https://preview.mailerlite.io/emails/webview/125516/112700993936819394</a>	A daily update from Climate and Economy
<a href="https://www.undp.org/kazakhstan/stories/organic-farming-not-just-trend-its-future-agriculture">https://www.undp.org/kazakhstan/stories/organic-farming-not-just-trend-its-future-agriculture</a>	As the United Nations lead agency on international development, UNDP works in 170 countries and territories to eradicate poverty and reduce inequality. We help countries to develop policies, leadership skills, partnering abilities, institutional capabilities, and to build resilience to achieve the Sustainable Development Goals (SDGs).
<a href="https://www.ellenmacarthurfoundation.org/">https://www.ellenmacarthurfoundation.org/</a>	The circular economy is a system where materials never become waste and nature is regenerated. In a circular economy, products and materials are kept in circulation through processes like maintenance, reuse, refurbishment, remanufacture, recycling, and composting. The circular economy tackles climate change and other global challenges, like biodiversity loss, waste, and pollution, by decoupling economic activity from the consumption of finite resources.
<a href="https://www.thegreatsimplification.com/">https://www.thegreatsimplification.com/</a>	The Great Simplification with Nate Hagens is a podcast that explores the systems science underpinning the human predicament. Conversation topics will span human behavior, monetary/economic systems, energy, ecology, geopolitics and the environment. The goal of the show is to inform more humans about the path ahead and inspire people to play a role in our collective future. Guests will be from a wide range of scientists, leaders, activists, thinkers, and doers.
<a href="https://holmgren.com.au/">https://holmgren.com.au/</a>	Popularly seen as a 'cool' form of organic gardening, permaculture could be better described as a design system for resilient living and land use based on universal ethics and ecological design principles. Although the primary focus of permaculture has been the redesign of gardening, farming, animal husbandry and forestry, the same <a href="#">ethics</a> and <a href="#">principles</a> apply to design of buildings, tools and technology.  Applying permaculture ethics and principles in our gardens and homes inevitably leads us towards redesigning our ways of living so as to be more in tune with local surpluses and limits.
<a href="https://conservationcorridor.org/mission/">https://conservationcorridor.org/mission/</a>	Corridors in the land- and seascape are among the most important conservation strategies in the face of global changes such as habitat

	<p>fragmentation, habitat destruction, and climate change. We aim to bridge the science and practice of conservation corridors and connectivity. <b>Conservation Corridor</b> will provide up-to-date findings from science that will inform applied conservation. We will highlight new innovations in applied conservation, with the goal of guiding the direction of applied science toward management needs. Our mission is to inform, educate, support, and give voice to all those with an interest in connectivity and conservation.</p>
<p><a href="https://channelmcgilchrist.com/about/">https://channelmcgilchrist.com/about/</a></p>	<p>Iain McGilchrist is a former Fellow of All Souls College, Oxford, an associate Fellow of Green Templeton College, Oxford, a Fellow of the Royal College of Psychiatrists, a Fellow of the Royal Society of Arts, a Consultant Emeritus of the Bethlem and Maudsley Hospital, London, a former research Fellow in Neuroimaging at Johns Hopkins University Medical School, Baltimore, and a former Fellow of the Institute of Advanced Studies in Stellenbosch. He now lives on the Isle of Skye, off the coast of North West Scotland, where he continues to write, and lectures worldwide.</p> <p>He is committed to the idea that the mind and brain can be understood only by seeing them in the broadest possible context, that of the whole of our physical and spiritual existence, and of the wider human culture in which they arise – the culture which helps to mould, and in turn is moulded by, our minds and brains.</p>
<p><a href="https://greattransition.org/about/aims-and-background">https://greattransition.org/about/aims-and-background</a></p>	<p>The Great Transition Initiative is an online forum of ideas and an international network for the critical exploration of concepts, strategies, and visions for a transition to a future of enriched lives, human solidarity, and a resilient biosphere. By enhancing scholarly discourse and public awareness of possibilities arising from converging social, economic, and environmental crises, and by fostering a broad network of thinkers and doers, it aims to contribute to a new praxis for global transformation.</p>
<p><a href="https://tyndall.ac.uk/people/kevin-anderson/">https://tyndall.ac.uk/people/kevin-anderson/</a></p>	<p>Kevin Anderson holds the Zennström professorship at Uppsala University and is chair of energy and climate change at the School of Mechanical, Aerospace and Civil Engineering (MACE) at the <a href="#">University of Manchester</a>. He has been Deputy and Interim Director of the Tyndall Centre. He is a non-executive director of Greenstone Carbon Management. Kevin is research active with recent publications in Science, Nature and Nature Geosciences.</p>
<p><a href="https://postgrowth.org/">https://postgrowth.org/</a></p>	<p>The Post Growth Fellowship is a nine-month <a href="#">content collaboration</a> with researchers, thought leaders, activists, artists, and entrepreneurs from a range of backgrounds, cultures, histories, and geographies—united by their work in post-capitalist fields and alternative approaches beyond economic growth.</p>

	<p>The vision is to open up and broaden the conversation around post-growth ideas, information, and inspiration, in recognition that many alternative approaches are emerging from, and continue to be stewarded in, the Global South and historically marginalized communities across the world.</p> <p>Through the Fellowship we facilitate group conversations and presentations, as well as curating and promoting Fellows' content.</p>
<a href="https://www.andrewmillison.com/">https://www.andrewmillison.com/</a>	Andrew Millison is an agent for change who shares permaculture wisdom through expressions of art, design and multimedia storytelling.
<a href="https://www.resilience.org">https://www.resilience.org</a>	Resilience.org aims to support building community resilience in a world of multiple emerging challenges: the decline of cheap energy, the depletion of critical resources like water, complex environmental crises like climate change and biodiversity loss, and the social and economic issues which are linked to these. We like to think of the site as a community library with space to read and think, but also as a vibrant café in which to meet people, discuss ideas and projects, and pick up and share tips on how to build the resilience of your community, your household, or yourself.
<a href="https://un-denial.com/">https://un-denial.com/</a>	I'm a 65 year old retired systems software developer and high-tech executive with an honors M.A.Sc. Electrical Engineering degree from UBC. I'm concerned about human overshoot, the damage we are doing to a very special planet, and the high probability of collapse in the not too distant future. I'm fascinated and horrified by our collective denial of our predicament. I sometimes like to think of myself as <a href="#">Varki's Huxley</a> . I'm trying to build some personal resilience to the coming storms while volunteering my time on useful projects, and enjoying the good days that remain with as small a footprint as possible.
<a href="https://www.oneearth.org/">https://www.oneearth.org/</a>	One Earth is a nonprofit organization working to accelerate collective action to solve the climate crisis through groundbreaking science, inspiring media, and an innovative approach to climate philanthropy. The solutions for the climate crisis already exist, and the latest science led by One Earth shows we can achieve the critical 1.5°C goal through our <a href="#">three pillars of collective action</a> :
<a href="https://www.postcarbon.org/about-us/">https://www.postcarbon.org/about-us/</a>	<p>Our Mission</p> <p>Founded in 2003, Post Carbon Institute's mission is to lead the transition to a more resilient, equitable, and sustainable world by providing individuals and communities with the resources needed to understand and respond to the interrelated ecological, economic, energy, and equity crises of the 21st century.</p>
<a href="https://www.imf.org/en/About">https://www.imf.org/en/About</a>	The IMF is a global organization that works to achieve sustainable growth and prosperity for all of its 190 member countries. It does so

	by supporting economic policies that promote financial stability and monetary cooperation, which are essential to increase productivity, job creation, and economic well-being. The IMF is governed by and accountable to its member countries.
<a href="https://kunstler.com/writings/clusterfuck-nation/">https://kunstler.com/writings/clusterfuck-nation/</a>	James Howard Kunstler says he wrote <i>The Geography of Nowhere</i> , "Because I believe a lot of people share my feelings about the tragic landscape of highway strips, parking lots, housing tracts, mega-malls, junked cities, and ravaged countryside that makes up the everyday environment where most Americans live and work."
<a href="https://thenextwavefutures.wordpress.com/">https://thenextwavefutures.wordpress.com/</a>	Some words about me  <a href="#">Andrew Curry's futures blog</a>
